4.10 - The Big M Method

410 - The Big M Method In the optimal solution, all artificial variables must be set equal to zero To accomplish this, in a min LP, a term $M a_i$ is added to the objective function for each artificial variable a_i For a max LP, the term $-M a_i$ is added to the objective function for ...

Chapter 13: Binary and Mixed-Integer Programming

The variables are ordered according to their objective function coefficients so that $0 \leq c_1 \leq c_2 \leq \dots \leq c_n$ This may seem like a restrictive set of conditions, but many problems are easy to convert to this form For example, negative objective function coefficients are handled by a change of variables in which x_j
